## Flat Diamond Mesh Lath

### A Galvanized Expanded Steel Plaster/Stucco Base

**YazhaoTech Stucco Hex wire** is manufactured from hot-dipped galvanized wire, Class I galvanization, Reinforcement for Portland cement, gypsum plaster, masonry veneer and ceramic tile, there are three different size, 17 Gauge, 18 Gauge, 20 Gauge, with a furring, so that they are easy to install, the roll size is Regularly 36"x150',

#### Advantages

- The best furring in the market
- Furring gives better adhesion to concrete
- Light roll
- Manufactured with high standards of product quality
- High production capacity

Stucco Hex wire

#### ASTM & Code Standards:

- ASTM No. A641-98-Galvanized wire Requirements Class 1
- ASTM No. C1032-98-Woven wire lath Requirements
- ASTM No. C1063-99-Furring and installing woven wire base requirements,
- AC 191 ICC-ES Acceptance Criteria for Metal Plaster Base

#### Storage:

All stored materials shall be kept dry. Materials shall be stacked off the ground, supported on a level platform, and protected from the weather and surface contamination. Per ASTM C-1063

#### Limitations:

Galvanized steel products should not be used with magnesium oxychloride cement stucco or Portland cement stucco containing calcium chloride additives.
